

Event Analytics Factory

From natural-language tasks to
live AI scenarios, real-time events
and visual metrics

MARKET DRIVERS: TECHNOLOGICAL SHIFT OF THE INDUSTRY

Today the video analytics market remains **fragmented**:

standalone CV modules

different VMS platforms

many pilots and complex integration

high development and scaling costs

difficult to collect and annotate datasets manually

2015–2020

CV detectors

- people
- faces
- license plates
- smoke / fire
- vehicles

2020–2024

AI modules and scenarios

- PPE & safety
- hazardous zones
- process control
- queues & service
- behavioral analytics

2024–2027

Generative AI + VLM

- natural-language prompts
- automatic model creation
- scenario generation
- synthetic datasets

2027+

Multimodal Event Analytics Platforms

- AI Factory
- Scenario Engine
- multimodal analytics
- Cloud / Edge / OnPrem

The market is moving from standalone AI modules to next-generation platforms — **Event Analytics Factories.**

GLOBAL AI MARKET

(Worldwide)

CAGR 22.7%

2026–2034

949B+ USD

by 2034

Demand is rising across industries: security, manufacturing, retail, transport and more

Task complexity is shifting from detection to event and process understanding

The market is moving toward unified AI infrastructure and platform-based solutions

Source: IMARC Group

Fragmented market today

Shift toward intelligent AI platforms

Fast growth of the global AI market

New era: AI-native platforms and autonomous scenarios

WHY TODAY'S VIDEO ANALYTICS IS HARD TO SCALE

Most AI monitoring scenarios still require a separate production pipeline from data collection to deployment.

THE PROBLEMS

 High development and deployment cost

 Manual data annotation

 Data collection, annotation and training take weeks

 Almost every new camera view requires re-adaptation and model tuning

 Difficult scaling of AI scenarios

In traditional video analytics, each new use case becomes a **separate, complex and expensive** production pipeline.

THE GAP: EXISTING SYSTEMS CAPTURE VIDEO, BUT CANNOT GENERATE NEW EVENT SCENARIOS FAST ENOUGH

The opportunity is not to add more cameras —
but to turn existing infrastructure into **real-time event intelligence**.

Data sources
already exist

Missing intelligence layer
creates the gap

Business impact
is significant

AI opportunity
unlocks real-time value

EVENT ANALYTICS FACTORY: FROM NATURAL-LANGUAGE TASK TO LIVE AI SCENARIO

An end-to-end system that turns any request into **live scenarios**, **real-time events** and **visual metrics**.

From a simple request to **live scenarios**, **real-time events** and **visual metrics** – **in minutes**.

10X FASTER
from idea to
live scenario

NO AI EXPERTISE REQUIRED
designed for operations,
not ML engineers

REUSABLE
models, rules and data
across use cases

**SCALE ACROSS THOUSANDS
OF CAMERAS**
fast adaptation and deployment

CONTINUOUSLY LEARNING
adapts and improves
over time

ARCHITECTURE: EVENT ANALYTICS FACTORY CORE

Unified AI ecosystem for
real-time event intelligence

BUSINESS APPLICATIONS

The platform is already used for **event analytics** across multiple industries

INDUSTRY

Safety and production control

AI overlays in the industrial scene include:

- No helmet (warning icon)
- Restricted zone (warning icon)
- Smoke / fire (warning icon)
- Forklift in motion (warning icon)
- Idle equipment (warning icon)

Bottom navigation: Industrial safety | Process control | 24/7 AI monitoring

HORECA

Service, kitchen and guest experience

AI overlays in the HORECA scene include:

- Queue (people icon)
- Service time 12 min (clock icon)
- Table not cleaned (X icon)
- Kitchen control (chef icon)
- SLA 94% (bar chart icon)
- Guest experience (people icon)
- Service analytics (bar chart icon)
- Kitchen AI (chef icon)

Bottom navigation: Guest experience | Service analytics | Kitchen AI

RETAIL

Security, sales and store operations

AI overlays in the retail scene include:

- Queue at checkout (people icon)
- Shoplifting risk (eye icon)
- Shelf stockout (warning icon)
- Customer flow (person icon)
- Staff absence (person icon)
- Conversion +18% (bar chart icon)

Bottom navigation: Security | Retail analytics | Store KPI

SMART ENVIRONMENTS

Public spaces, transport and smart buildings

AI overlays in the smart environments scene include:

- Traffic monitoring (car icon)
- Crowd detection (people icon)
- Incident detection (warning icon)
- Parking occupancy 72% (P icon)
- Energy efficiency (leaf icon)

Bottom navigation: Public safety | Mobility analytics | Energy management

100+ ready
AI scenarios

Flexible deployment:
Cloud / On-Prem / Edge

VLM + Generative AI
for new scenarios

Unified analytics
across the network

Integrations with VMS,
ERP, CRM and POS systems

One AI platform for **safety, operational control** and **business efficiency** growth

From enterprises to retail, HoReCa, transport,
smart buildings and cities

BUSINESS MODEL

Scalable **B2B SaaS**, licensing and reusable AI scenarios

Multimodal Event Analytics Platform

1

Paid Pilots

- Validate use case and ROI
- 1–3 sites / limited scope
- Scenario adaptation
- Data validation
- Operational metrics
- Conversion to contract

Fast validation.
High conversion.

2

Enterprise Licenses

- Annual or multi-year license
- Multiple sites / streams
- On-prem / hybrid deployment
- Enterprise support
- Advanced integrations
- SLA and security

Large-scale deals.
Long-term value.

3

SaaS Subscriptions

- Cloud platform access
- Dashboards and alerts
- Scenario management
- Analytics and reporting
- User roles and permissions
- Continuous updates

Recurring revenue.
Predictable growth.

4

Implementation & Integration

- VMS / NVR integration
- ERP / CRM / POS / SCADA
- Camera and site setup
- Custom business rules
- Training and onboarding
- Project management

Professional services.
Deployment revenue.

5

Marketplace of Models & Scenarios

- Reusable AI models
- Ready scenario templates
- Industry-specific packs
- Partner ecosystem
- Faster rollout
- Co-selling opportunities

Scalable monetization.
Ecosystem growth.

6

Support & Continuous Improvement

- 24/7 monitoring
- Technical support
- Model improvement
- New scenarios
- Platform updates
- SLA and reliability

High retention.
Continuous value.

PRIMARY TARGET INDUSTRIES

Industry

- PPE & safety compliance
- Hazardous zones
- Smoke / fire detection
- Process deviations
- Equipment monitoring

Retail

- Queue analytics
- Theft & violations
- Shelf / zone monitoring
- Staff behavior analytics
- Customer flow analytics

HoReCa

- People counting
- Service quality control
- Kitchen safety
- Empty glasses / tables
- Staff efficiency

Logistics

- Warehouse zone control
- Loading / unloading
- Vehicle counting
- Worker activity
- Process bottlenecks

Transport

- Vehicle & passenger flow
- Abandoned objects
- Security incidents
- Traffic violations
- Infrastructure monitoring

Banks

- Queue & branch analytics
- Suspicious behavior
- Service quality control
- Access control events
- Staff & customer flow

Smart City

- Public safety
- Crowd density
- Urban violations
- Traffic & pedestrian analytics
- Emergency detection

One platform. Multiple industries. Recurring revenue.
Reusable AI scenarios create scalable value.

EXPECTED ACV

Pilot: €25k – €50k
Mid-market: €60k – €120k / year
Enterprise: €150k – €300k / year

PATH TO €1M ARR (EXAMPLE)

10 pilots × €30k = €300k
15 mid-market × €70k = €1.05M
or 5 enterprise × €200k = €1M

Scalable SaaS model
high gross margin

Recurring revenue
and long-term contracts

Cross-industry
applicability

Ecosystem & marketplace
network effects

Strong retention
and expansion potential

EU / GLOBAL GO-TO-MARKET

Building a European company to scale **Event Analytics Factory** across global markets

01

ESTABLISH EUROPEAN COMPANY

- European legal entity
- Banking, accounting and legal setup
- EU commercial rights
- GDPR-ready documentation
- Operational foundation for EU sales

Strong foundation for compliant growth across Europe

02

PACKAGE FOR EU MARKETS

- English-first sales materials
- Standard pilot packages
- Industry scenario bundles
- Cloud / edge / on-prem options
- Compliance and onboarding materials

Ready-to-sell packages that speed up pilots and adoption

03

LAUNCH PAID PILOTS

- First 10-20 qualified opportunities in 12 months
- Priority verticals:
 - Industry
 - Retail
 - HoReCa
 - Logistics
 - Transport
 - Smart environments
- Run pilots, prove ROI, convert to contracts

Proven ROI and reference clients drive conversions and recurring revenue

04

SCALE THROUGH PARTNER CHANNELS

- System integrators
- VMS / security providers
- Cloud and edge partners
- Industry associations
- Smart infrastructure partners
- Scale across Europe and selected global markets

Partners amplify reach, accelerate scale and open new markets

OUR TARGETS

10-20

qualified commercial opportunities in 12 months

3-5

paid pilots in the first EU phase

€1M

revenue path within 6 months after acceleration

GLOBAL

export-oriented AI company from Europe

12-MONTH GO-TO-MARKET ROADMAP

Q1

SETUP & POSITIONING

- European company setup
- Sales materials
- Partner mapping

Q2

PILOT PACKAGING

- Standard offers
- Compliance docs
- Demo environments

Q3

PAID PILOTS

- Launch pilots
- Validate ROI
- Refine scenarios

Q4

COMMERCIAL SCALE

- Convert pilots
- Multi-site deployments
- Partner activation

Scalable business model with recurring revenue

High gross margin SaaS + services

Partner-led growth and global reach

Reusable AI scenarios reduce time to value

Strong compliance and data security

TEAM

Founders combining enterprise AI leadership, product strategy, and deep scientific expertise

Sergei Fedorov

CEO & Co-Founder

- 16+ years in enterprise software, AI and product leadership
- Started in mathematics and software engineering; grew from developer to CTO to CEO
- Leads product strategy, go-to-market, partnerships and commercialization
- GlobalCIO Top-100 IT Leaders 2026

Valeriia Efimova

Co-Founder • AI Research Lead (ext Google)

- **PhD in Artificial Intelligence**
- 50+ publications in peer-reviewed AI journals
- Expert in AI, Computer Vision, Gen AI, Deep Learning, Industrial AI and scientific R&D
- Yandex ML Prize laureate

[Google scholar link](#)

Viachaslau Shalamau

Co-Founder • CTO (ext Google)

- **PhD in Artificial Intelligence**
- 40+ publications in peer-reviewed AI journals
- Expert in AI, ML Solution Architect, LLM/RAG, Data Platforms, Industrial AI
- Yandex ML Prize laureate

[Google scholar link](#)

Enterprise AI leadership

PhD-level scientific expertise

90+ AI publications

Global R&D experience

Technologies that see, hear and understand
